Did you know?

Salmonella infection

Almost any kind of food or beverage can carry the bacteria that causes salmonella infection, although meat and eggs are the most common sources.

Contaminated food or drink

How salmonella progresses

Bacteria travel to small intestine, adhere to lining, begin life cycle

In severe cases, bacteria break through intestinal wall to bloodstream; can be deadly if not properly treated

Symptoms

Within 12-72 hours

Nausea, vomiting, fever, diarrhea, abdominal cramps

4-7 days illness ranges from mild to severe; most people recover without treatment

Severe cases More likely with infants, elderly, people with impaired immune systems

Treatment

Oral or injected antibiotics, usually for 2 weeks
